5. ILLUSTRATIVE SCENARIOS (FOR ILLUSTRATION ONLY)

#	Scenario	Total Shares	Settlement Amount	Remark
A	Share closes at or above Forward Price but below Knock-out Price on every day (no gearing, no knock-out)	260,000	MYR 1,040,000.00	Investor buys at Forward Price; gain if Share > Forward Price
B	Share closes below Forward Price on every day (gearing applies daily)	520,000	MYR 2,080,000.00	At Final Price MYR 3.20 loss = MYR 416,000.00
C	Knock-out on Day 10 of Period 1 (Minimum Accumulation applies)	46,000	MYR 184,000.00	Min. 46,000 shares at Forward Price

RISK FACTORS (NON-EXHAUSTIVE)

1. The Investor is obliged to accumulate shares at the Forward Price on every Accumulation Day even if the market price is far below the Forward Price; maximum loss is the Maximum Notional Amount (up to MYR 2,080,000.00), not only the margin.
2. Gearing doubles the quantity bought when the share price is below the Forward Price, magnifying losses.
3. Upside is capped: the Product terminates on a Knock-out Event and the Investor cannot accumulate further shares at the Forward Price.
4. Margin calls: the Issuer may demand additional collateral at short notice; failure may result in close-out at significant loss.
5. Mark-to-market value is determined by the Issuer using an option pricing model and may deviate materially from intrinsic value; volatility increases can reduce value.
6. Liquidity: no secondary market; early termination only at Issuer discretion.
