RISK FACTORS (NON-EXHAUSTIVE)

1. Principal at risk: if a Knock-in Event occurs and the Final Level is below the Initial Level, the investor bears the full index decline and may lose substantially all capital.
2. The twin-win downside participation is lost for good once the Knock-in Level is breached on any day (continuous daily-close observation).
3. Returns (including twin-win and coupons) are capped; participation above the cap is forgone.
4. Autocall risk: early redemption ends participation; no coupon is paid if the Note is not called.
5. Credit risk of the Issuer; limited secondary market and wide bid-offer spreads; index sponsor adjustments and disruption events may apply.
