RISK FACTORS (NON-EXHAUSTIVE)

1. Principal at risk: if the Note is not called and the worst-of Underlying is below the Knock-in Barrier on the Final Valuation Date, the investor bears the full decline of the worst performer and may lose substantially all capital.
2. No coupon is paid if the Note matures uncalled and not knocked in via the Obs 6 step-down barrier; the investor may receive only 100% of Nominal after 18 months (opportunity cost).
3. Worst-of structure: a fall in any single Underlying drives the outcome; correlation between the Underlyings is a key driver of risk.
4. Early redemption (autocall) risk and reinvestment risk; returns are capped at the Autocall Coupon.
5. Credit risk of the Issuer; limited secondary market; HKEX-listed shares are subject to Hong Kong market, regulatory and trading-halt risks.
